PHOENIX ROOFING PROJECT
USDA APHIS

Project Location :

- Phoenix Roof, 3645 E Chipman Rd., Phoenix, Az

Requirement:

- Required for this project was a total clean up and removal of approximately 30 tons of gravel and dust from a 70000 square foot flat roof. After removal placing of 2in of foam roofing material as well as elastomeric top coatings.

Challenges:

- This roof is older as it was built in 1984. Noted on roof is a severe lack of slope on 6 of 9 total sections. Corrected by using foam to create slope. Other challenges included close proximity vehicles and a working plant. Daily coordination with facility supervisors and surrounding companies to try and avoid overspray. In addition we had a larger than normal amount of rain which set us back several days. This job was completed per the customer's needs and satisfaction. Hope to continue to do more work in the future.

Result:

- Some key factors on this job were the resilience of our team to work together to overcome the obstacles we encountered. The teamwork shown to complete the job even under pressure.
