

## Case Study

### Contract

Contract number: P17PX03450  
Contract Amount: \$67,733.97  
Contracting officer: Kathryn Logsdon  
(217)391-3225  
kathryn\_logsdon@nps.gov

### Project Location

Buffalo National River  
30 miles south of Harrison, Arkansas

### Requirement

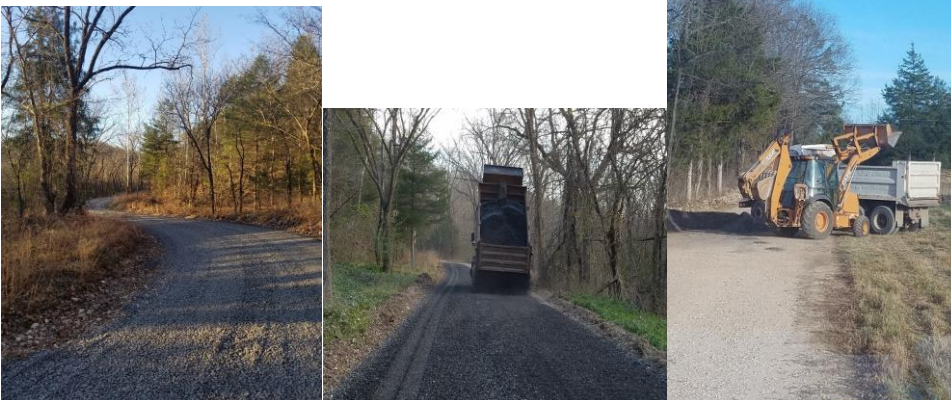

The project consisted of grading 4 Roads in Buffalo National River Area, nearly 30 miles south of Harrison, AR. Culverts in these roads were also repaired. Finally, gravel was spread in all roads with a thickness of 3 Inches.

### Challenges

- There was a concurrent government project for repaving highway 65, which effected hauling gravel for different roads.
- Scheduling had to be coordinated with other simultaneous works in Buffalo National River.

### Result

- GDI completed grading, repair and spreading gravel successfully for all 4 roads in Buffalo National River.

## Key Factors Contributing to the Success

### • *Persistency*

Persistency is one of the main characteristics of GDI staff. They don't get tired and keep working till they reach the result.

### • *Quality Control*

Green dream was committed to supply the required specification at all costs. So it took every measure to search and find the best material available in the area and finally did achieve the goal.

### • *Management*

The key element of success in this project was close and momentary control over all aspects including time, quality , probabilities, possible delays and ... We did not fear to face the problems. Instead we had the determination to solve them.
